Staff Acceptable ICT Use Policy

Introduction

This document sets out the security, administration and internal rules which you should observe when communicating electronically or using the ICT facilities provided by GEMS Metropole School (the 'School'). You should familiarise yourself with the terms of this policy so that you can make a very positive contribution to the use of ICT in the School. This policy applies to all teachers, employees, contractors and visitors of the School

Philosophy

GEMS Metropole uses the latest technological resources available for the teaching and learning of pupils as well as for all aspects of the administration within the school. This document outlines the rules and guidelines, for all staff, on the acceptable use of any computer facilities on the school premises. The document is designed to protect staff, pupils and the School.

The Policy

1. Email

- 1.1 You should check your school email at least twice a day.
- 1.2 You should familiarise yourself with the 'MTS Email and Netiquette' document in the Appendix
- 1.3 Please be aware that email is no more secure than sending a fax or a letter.
- 1.4 Email content that may seem harmless to you or even designed to amuse may in fact be seen in a different way by others.
- 1.5 If you receive inappropriate material by email, you should delete it immediately and not forward it to anyone else. It would be appropriate for you to discourage the sender from sending further materials of that nature.
- 1.6 Comments that are not appropriate in the workplace or school environment will also be inappropriate when sent by email. Email messages can easily be misconstrued. Accordingly, words and attached documents should be carefully chosen and expressed in a clear, professional manner.
- 1.7 Think twice before sending an email to large recipients. There may be a more effective way of communicating your request or intention.

2. Monitoring

- 2.1 The School's computer network is an educational and business tool to be used primarily for educational and business purposes. You therefore have a responsibility to use these resources in an appropriate, professional and lawful manner.
- 2.2 By default we work on trust and assume that all colleagues are using the ICT facilities in a professional manner. You should also be aware that the School is able to monitor your use of the Internet, both during school or working hours and outside of those hours. This includes the sites and content that you visit and the length of time you spend using the Internet.
- 2.3 All colleagues should be aware that external agencies such as the Police may access the email system.
- 2.4 Places of work (including educational establishments) have the ability to monitor emails. Emails at our School will not initially be monitored. However, in exceptional circumstances and where there is clear and proven cause for concern, the Principal may authorise in writing the

examination of contents and usage of email by the School or by a third party on the School's behalf. This could include electronic communications that are sent to you or by you, either internally or externally, to or from the School's email system.

3. Personal Use

3.1 You are permitted to use the Internet and email facilities to send and receive personal messages, provided that such use is kept to a minimum and does not interfere with the performance of your work duties.

3.2 However, you should bear in mind that any use of the Internet or email for personal purposes is still subject to the same terms and conditions as otherwise described in this Policy.

3.3 Excessive or inappropriate use of email or Internet facilities for personal reasons during working hours may lead to disciplinary action.

4. Inappropriate Behaviour

Inappropriate Behaviour relates to any electronic communication whether email, blogging (e.g. online diaries), text messaging or any other type of posting / uploading to the Internet.

It is commonly recognised that examples of inappropriate behaviour are:

- Accessing, uploading, downloading or distributing indecent, obscene, offensive or threatening material.
- The use of indecent, obscene, offensive or threatening language
- Engaging in personal, prejudicial, racial or discriminatory attacks.
- Harassing or bullying another person. Harassment is persistently acting in a manner that distresses or annoys another person either by email, online or via texts.
- Knowingly or recklessly sending or posting false, defamatory or malicious information about a person,
- Using the Internet for gambling or political purposes.
- Accessing material that is profane or obscene, or that encourages illegal acts, violence, or discrimination towards other people.
- Accessing another individual's materials, information, or files without the permission of the person;
- Violating copyright or otherwise using the intellectual property of another individual or organization without permission;
- Using passwords other than one's own without written permission of that person;
- Vandalizing, defined as any unauthorized access and/or malicious attempt to damage computer hardware/software or networks or destroying the data of another user, including creating, uploading, or intentionally introducing viruses;
- Using the network for commercial purposes;
- Gaining the network passwords and distributing these to the stud
- Gaining unauthorized access ("hacking") to resources or entities;
- Downloading and installing VPN's or using VPN's to gain access to inappropriate content
- Altering the set-up of computers as set by the system administrator;
- Using software which has not been assigned or approved by staff;
- Seeking to gain or gaining unauthorized access to information resources or other computing devices;

If you mistakenly access such material, please inform the Network Administrator immediately. If you are planning any activity which might risk breaking the acceptable use policy (e.g. research into terrorism for a legitimate project) the Network Administrator must be informed beforehand.

4.1 Colleagues should familiarise themselves with the relevant UAE & Dubai legislation covering this topic.

4.2 If a member of staff becomes aware of inappropriate use of the computer facilities by a student they should report it to the appropriate Head of Section.

5. Privacy

5.1 In the course of carrying out your duties on behalf of the School, you may have access to, or handle personal information relating to others, including pupils, colleagues, contractors, parents and suppliers. Email should not be used to disclose personal information of another, except with proper authorisation.

5.2 You should ensure that your user name and password are not used by anyone else. You must change your password regularly, as per the Password Policy established by GEMS Support Services.

5.3 You are encouraged to either lock your screen or log-out when you leave your desk. This will avoid others gaining unauthorised access to your personal information, the personal information of others and confidential information within the School. It is especially important that pupils do not have access to a staff account.

5.4 Pupil's information and images must not be stored or distributed on personal email or cloud storage.

6. Distribution and Copyright

6.1 You should respect copyright. Breaking copyright law occurs when you reproduce a piece of work that is protected by copyright. If you are unsure whether or not you can use a piece of work, you should request permission from the copyright owner. This includes music files and the copying of CD's etc. Please do not ask the Network Administrator to break copyright laws.

6.2 When distributing information over the School's computer network or to third parties outside the School, you must ensure that you and the School have the right to do so, and that you are not violating the intellectual property rights of any third party.

7. Viruses

7.1 The Internet is a potential host for computer viruses. The downloading of infected information from the Internet is potentially fatal to the School computer network. A document attached to an incoming email may have an embedded virus.

7.2 Virus checking is done automatically through virus protection software installed on the network server. If you are concerned about an email attachment, or believe that it has not been automatically scanned for viruses, you should contact the Network Administrator.

7.3 If you think that any school computing equipment may have contracted a virus, you must report the matter to a member of the ICT Support Team.

8. Absence

8.1 In cases where you are likely to be absent from work for any period of time (including all personal leave and school holidays), you need to make arrangements for your emails to be accessible by the School or ensure that an '*out of office reply*' is automatically set. This automatic reply will alert those trying to contact you that you are away from work and that important queries should be directed to a nominated colleague. If you require assistance in installing this feature, please contact the

Network Administrator. Please ensure that the “out of office” message is disabled immediately on your return to work.

9. Sanctions:

- 9.1 Sanctions can vary depending on the severity of the offence, from a warning or withdrawal of Internet use, to suspension or dismissal. Any breach of the law may lead to the involvement of the Police and will be reported to the governing body immediately.

10. General and Best Practice:

- 10.1 Think before you print – printing is expensive and consumes resources, which is bad for the environment. If you can use electronic means rather than printing, then do so. (Please refer to the Photocopying Policy.)
- 10.2 Always log off your computer when you have finished using it.
- 10.3 **Always back up your work if you are not saving it on the school system.** Work saved on the school noticeboards (or “shared drive”) is backed up every night for you, but be careful to save work kept on the desktop or hard drive of your device since these are not automatically backed up.
- 10.4 Avoid printing very large files. (Please refer to the Photocopying Policy.)
- 10.5 If someone makes you an offer on the web or via mail, which seems too good to be true, it probably is.
- 10.6 Observe health and safety guidelines – look away from the screen every 10 minutes to rest your eyes and make sure your chair is positioned and adjusted.
- 10.7 Housekeep your email regularly by deleting your sent and deleted items.
- 10.8 Leave your computer and the surrounding area clean and tidy.
- 10.9 If a web page is blocked that you feel you have a legitimate use for please ask The Network Administrator and it can be unblocked if approval is given.
- 10.10 If you are leaving the school permanently, please ensure you have saved any files or email you want to keep to a memory stick or CD to take home, as these files will be deleted.
- 10.11 If in doubt ask a member of the IT Support
- 10.12 Please ensure your students leave the computer rooms clean and tidy with the computers logged off.
- 10.13 Extra care must be taken to protect pupil data if stored on portable hard drives and USB sticks. It is considered best practice to avoid storing pupil information on removable devices because of the serious data protection implications of losing said data.
- 10.14 Ensure that you follow health & safety guidelines and best practice when students have to use their own devices. This includes ensuring there are no trip hazards from cables. Make sure students take regular screen breaks and that they are sitting at a table with an appropriate chair.

11. Policy Updates

This policy may be updated or revised from time to time. The School will not notify you each time the Policy is changed. If you are unsure whether you are reading the most current version, you should contact the Network Administrator.

12. General

The terms and recommended conduct described in this Policy are not intended to be exhaustive, nor do they anticipate every possible use of the School's email and Internet facilities. You are encouraged to act with caution and take into account the underlying principles intended by this Policy. If you feel unsure of the appropriate action relating to use of email or the Internet, you should contact the Network Administrator.
